SUBJECT: STATE AID AND FEDERAL AID

State Aid

State aid for the District is determined by various formulas as approved annually by the state legislature based on student census, student attendance, bus transportation expenses, debt service on capital construction projects and on specified educational programs.

Estimates of state aid revenue will be projected in April and May of each year for the following school year.

The District will complete and submit the various required state reporting forms and confer with the State Division of Educational Finance to ensure that the District maximizes its state aid revenue.

Federal Aid

The Board of Education will approve, through resolution, the receipt of all funds for federally financed programs.

Adopted: 1/12/99
